The following is an examiner's statement of reason for allowance:

Regarding claims 36, 43, 47, 51-53 & 57, the prior art of record neither shows nor suggests a flat panel display including all the claimed limitations of above claims, particularly the limitation of having a single gate insulator formed along the substrate and surrounding the cathode emitter tips and number of gate lines formed on the single gate insulator, wherein a distance separating the number of cathode emitter tips from the number of gate lines is significantly thinner than a separation distance separating the number of gate lines and the substrate.

Remaining claims are allowed being dependent on allowed base claim.
